

Best Energy Reduction Technologies, LLC (BERT) Files Complaint Claiming Patent Infringement Against BOSS CONTROLS LLC Seeking Damages and Injunction

April 9, 2014 – King of Prussia PA: On April 3, 2014, BERT, the owner and developer of the Bert® Wi Fi Plug Load Management System filed a complaint in the United States District Court, Eastern District of PA against BOSS CONTROLS, LLC for infringement of BERT's U.S. Patent No. 8,093,751. The complaint seeks damages for alleged past infringement and a permanent injunction from BOSS CONTROLS.

BERT, a leading supplier of Wi Fi Plug Load Management Systems, filed a complaint in the United States District Court, Eastern District of PA, against BOSS CONTROLS, LLC alleging infringement of BERT's U.S. Patent No. 8,093,751. The BERT patent for "a method and system for controlling power to an electrically powered device" was issued on January 10, 2012. The complaint seeks damages for alleged past infringement and a permanent injunction from BOSS CONTROLS. According to its web site, BOSS CONTROLS, designs, markets and sells innovative Wi Fi product solutions in the Energy Management sector.

About The Bert® Plug Load Management System

The Bert® Plug Load Management System consists of the Bertbrain software application and a virtually unlimited number of Berts®. By simply plugging water coolers, coffee machines, printers, copiers, etc. into Bert®, facility and energy managers can remotely measure, analyze and control all plug loads. Bert® runs on the existing Wi-Fi network so all devices can be remotely controlled in mass by creating schedules to turn equipment off when buildings are not in use during nights, weekends and holidays. The Bert® Plug Load Management System installs quickly, so energy savings are immediate and payback is between 1 and 3 years.

Learn more about how sporting venues, K-12 schools, colleges, offices, hospitals, state/local governments and retailers manage plug load with Bert® by visiting <http://www.bertbrain.com>.
